Exercise Induced Collapse (EIC) - PCR

result EIC

Result: Genotype: N/N

Interpretation: The dog is homozygous normal concerning the intact gene. The dog is genetically clear and will not be affected by EIC (Exercise Induced Collapse).

The dog can pass only the normal gene on to all its offspring.

The currently known mutation has been analysed.

The result is only valid for the submitted sample and for the breeds Labrador Retriever, Chesapeake Bay Retriever and Curly-Coated Retriever.

pedigree-id: DK07520/2011

chip-id: 208206000163211

tattoo-id: ---

The lab is accredited according to DIN ISO 17025 (AKS-PL-20922) for the services mentioned above. Responsibility for the correctness of animal ID data corresponding with the samples lies in the hands of the sender. Warranty cannot be accepted. Claim for damages is limited to the amount of the invoice for the performed lab test if not otherwise regulated by law.

Quantity discounts were granted.
